Mohid Dastgeer

Front-End Web Developer

As a Front-End developer with close to four years of experience, my technical expertise lies in Angular and React JS, as well as backend technologies like Express, NodeJS, NestJS, and MongDB. Throughout my career, I have had the opportunity to work on projects across various sectors including E-commerce, Fintech, Healthcare, Social Media, and GIS.

HTML/CSS
RxJS
Redux
NgRx
Tailwind CSS/ Bootstrap 5
Responsive Web Design
API Development & Integration
Performance Optimization
Version Control
Cross-Browser Compatibility

Languages

English
Urdu

Experience

2023 - Dec, 2023

Quaid Technologies/ DEPA Interiors, LLC

Front End Developer (Angular)

Here is a summary of the projects:

- Low-code/No-code App Store and Employee/Workflow Management System
- Headless E-commerce Platform
- Event Creation and Management Platform for Pakistan Endocrine Society

As a professional in this role, my main responsibility was developing a custom corporate app store for DEPA, which provides a centralized location for managing the organization and its subsidiaries' applications and modules. The app store includes many features such as drag-and-drop form builder, Active Directory authentication, workflow creation with approval/rejection functionality, PDF forms, and more.

In addition to the app store, I also worked on building a headless e-commerce platform, similar to Shopify, and an extensive event management system for the Pakistan Endocrine Society.

2021 - 2022

Solis Solutions

Angular Developer

The following is a list of projects/products:

- Social Media Management platform
- E-Commerce Merchant and Seller platform
- NFT marketplace
- Football club media posting platform.

As an Angular/Front-End developer, my duties encompassed designing visually appealing and responsive user interfaces, conducting code reviews, and fixing bugs to optimize performance. Additionally, I ensured version control and code upgrades for quality and scalability purposes, incorporated unit tests to validate functionality, seamlessly integrated APIs, and managed state with RxJS Observables and Subjects.

2021 - 2022

Solis Solutions/ BlockyFy

React JS Developer (Part Time)

These are the two projects/products I worked on:
- Social Media/NFT platform
- StableFund Secure Crypto Wallet

In my capacity as a React JS developer, I was employed on a part-time basis by BlockyFy, the parent company of Solis Solutions. My responsibilities included developing responsive UI components using React, debugging code and troubleshooting performance issues, ensuring quality and scalability of codebases, integrating APIs using Redux Thunk, managing data flow and state with Redux, leading the front-end team, mentoring junior developers, handling deadlines, and addressing problems.

2020 - Present

Freelance Development

Full Stack Developer

Projects:
- U.S Border Patrol Museum Memorial Management Dashboard
- Astronomy Student Portfolio
- Animation Blogging platform

As a freelance developer, I've successfully completed a variety of projects tailored to meet client specifications. These include student final year projects, dynamic product showcase websites, and personalized portfolios.
